# PRINT SERVICES

*Matchboard pride themselves on their ingenuity and creativity. To ensure we keep one step ahead of the game, in 2018 we introduced an in-house print department and design service, Image 2020.*

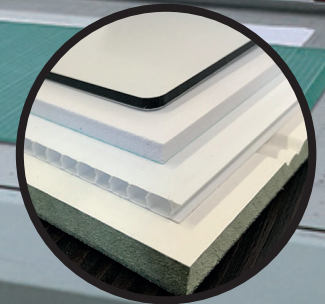

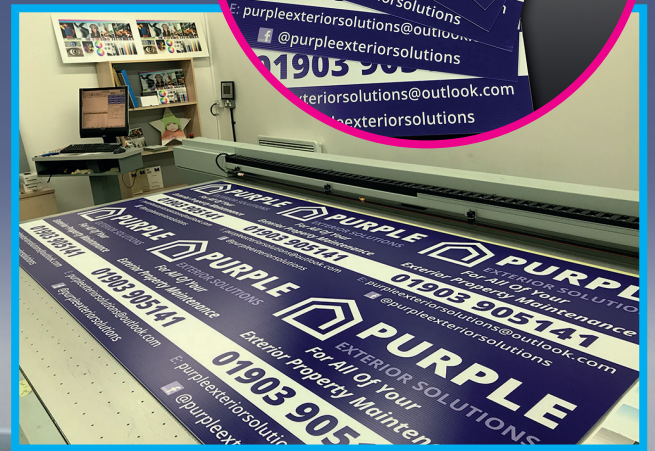

## DIRECT TO MEDIA PRINT

We installed a flat bed printer which digitally prints directly onto the surface of a chosen material such as MDF, wood, plastic, correx, acrylic and ACM. Digital printing with the standard full colour inks it also prints white, in 2 layers as required, and produces high quality solid colours and images. The UV inks are cured and robust enough for any surface, perfect for interior and exterior signage with out the need for laminating.

The additional facility to print onto roll media means we can also produce banners, posters, pop-ups and self adhesive vinyl stickers and decals.

Capable of printing sheet sizes 1.2 x 2.5m up to 40mm thick the Arizona 350 GT printer not only allows Matchboard to develop our own MDF printing projects but to also offer a print service for the trade and general public.

For further information, enquiries and quotes please go to our dedicated website [www.image2020.co.uk](http://www.image2020.co.uk).
