EXTREME - ALL-WEATHER DÉCOR PANEL

If you are looking for an alternative solution to your exterior cladding, then Matchboard's innovative Extreme all weather décor panel can give you the ability to create elegant and bespoke fascia's which utilises Medite Tricoya Extreme materials. *The medite material offers Durability and Peace of mind with a 25 year in-ground and 50 year above ground guarantee.*

The commonly used joint utilises the split profile edge for a seamless vertical joint but there are three other edge formats you can use.

If you require a more watertight edge on your project, then you could use either the Tongue and Grooved edge or the Half Lap edge to achieve more contact for the sealing of the joints.

Finally, there is available a machined finished trim in two sizes to give additional security to the joint seal of the project.

EDGE FORMATS

Split Profile

T & G

Half Lap

Straight

Cover strips available
for concealing joints
